EventHistory table		History data for Karma zone events.
TimeStamp	int4	Start date/time for the event
EventName	unicodestring[100]	Name of the event (eg. BAF)
AuthName	unicodestring[64]	Account name for this player
Name	unicodestring[42]	Player character name
DBID	int4	DBID for the character (lets us check deleted/renamed characters)
Level	int4	Character level (0-based) during the event
Class	attribute	Character Archetype
PrimaryPowerset	attribute	Character Primary powerset
SecondaryPowerset	attribute	Character Secondary powerset
BandTable	unicodestring[100]	Reward table awarded by band
PercentileTable	unicodestring[100]	Reward table awarded by percentile
OfferedTable	int4	Which reward table offered (0 = no table, 1 = band table, 2 = percentile table)
RewardChosen	unicodestring[100]	Item (if any) chosen by the character
StagesPlayed	int4	Number of stages of the event played by this character
StagesQualified	int4	Number of stages of the event qualified (played successfully) by this character
StagesAvgScore	int4	Weighted average score for all event stages for this character
StagesAvgPercentile	int4	Weighted average percentage rating for all event stages for this character
TimePaused	int4	How long in seconds (if at all) the character's participation in the event was paused
StagesPaused	int4	How many stages the character received credit for while paused (should only be 0 or 1)
StageScore1	int4	Score for stage 1
StageThreshold1	int4	Threshold for stage 1 (same for everybody)
StageRank1	int4	Rank for stage 1
StagePercentile1	int4	Percentile for stage 1
